Project Name	Smart Farmer - IOT Enabled Smart Farming Application

Created IBM IOT Platform and a Device

The screenshot displays the IBM Watson IoT Platform interface. The browser address bar shows the URL: `ijtdcw.internetofthings.ibmcloud.com/dashboard/devices/drilldown/NodeMCU-node-mcu-4321?returnTo=/devices/browse`. The page title is "Device Drilldown - node-mcu-4321".

On the left, a sidebar menu lists various options: Device Credentials (selected), Connection Information, Recent Events, State, Device Information, Metadata, Diagnostics, Connection Logs, and Device Actions.

The main content area is titled "Device Credentials" and includes the following information:

- Organization ID: `ijtdcw`
- Device Type: `NodeMCU`
- Device ID: `node-mcu-4321`
- Authentication Method: `use-token-auth`
- Authentication Token: `987654321`

A warning message states: "Authentication tokens are non-recoverable. If you misplace this token, you will need to re-register the device to generate a new authentication token." Below this, a link says "Find out how to add these credentials to your device".

At the bottom right, a status box indicates "0 Simulations running".
